## **Gluten**

MEGGLE Product: Reta M<sup>®</sup>

The Product is a co-processed, directly compressible spray agglomerate comprising 50 % Mannitol (Ph. Eur. / USP-NF / JP) and 50 parts Hypromellose (Ph. Eur. / USPNF / JP).

The compound mannitol is derived from maize starch and/or wheat starch hydrolysis. When tested with the best available technique R5 Sandwich ELISA Kit, the absence (< 20 ppm) of wheat gluten is confirmed.

Cross-contamination by intentionally used cereals containing gluten, namely wheat, rye, barley, oats, spelt, kamut or their hybridised strains and products is excluded. The presence of gluten is not expected.

Best regards
